About This Game

You play Adam Jensen, an ex-SWAT specialist who's been handpicked to oversee the defensive needs of one of America's most experimental biotechnology firms. Your job is to safeguard company secrets, but when a black ops team breaks in and kills the very scientists you were hired to protect, everything you thought you knew about your job changes.

Key Features:

- **A divided near-future:** discover a time of great technological advancement, but also a time of chaos and conspiracy. Mechanical augmentations of the human body have divided society between those who can afford them, and those who can't. Opposing forces conspire from the shadow to control the destiny of mankind: a human revolution is coming.
- **A perfect mix of action and role-play:** the game uniquely combines action-packed close-quarters takedowns with intense shooting, offering a vast array of character augmentations and upgrades for the many weapons at your disposal. Unlock new abilities and increase your stealth, social, hacking or combat skills: the game rewards all styles of play and approaches. Determine how you want your character to evolve, based on how you want to play the game.
- **Choices and consequences:** shoot your way through the enemies, sneak up behind them without being traced, hack systems to retrieve crucial information, or use your social skills to extract information from key characters – there are always choices, multiple approaches, multiple paths and multiple tools at your disposal. Choose your playing style and face the consequences of your actions: you decide how the story unfolds in his enhanced storyline featuring the full integration of "The Missing Link" and "Tongs Mission". Find more ways to defeat the new and improved Boss Fights, use the Newgame+ feature to replay the story with your previously acquired augmentations. Learn more about the game

Meh. I don't know. I had great hopes for this game and it wasn't bad but I didn't find it great either. It was just OK. When I reached the Boss Fight in this System Shock looking arena I uninstalled it after a few tries. Didn't care for the story nor the characters. I will still recommend the game because there are certainly people out there who will enjoy it.. If you like games with stealth and infiltration missions, you MUST play it. Otherwise, if you are looking for a good FPS you are in the wrong place.

Great story and mechanics. Its basiclly Cyberpunk 2077. Awesome, intresting, beautiful.. One of the best RPG games i have played it's a gem that everyone should play it . Nuff said.. This is the #1 most immersive video game I have ever played. The atmosphere is incredible. It's one of those games where you should play it late at night, shut off the lights, and just take it in. The dialogue system (which is upgradeable!) is extremely unique with the choices you make, and how those choices affect the narrative. Gunplay is satisfying, but the fact that you can go through the entire game without ever having to kill anyone is amazing to me. Compounded with the multiple paths you can take to complete a mission, you'll feel like you really have a lot of choices here in and out of dialogue. 9/10 game. My only complaint is that everyone looks like they've been rubbed with vaseline in the pre rendered cutscenes, but you'll get use to them.. First I really wasn't someone, who would want to play this game. It is really confusing how it looks and if you play it once per month like me, you will be totally lost in this game. But after all, I've really enjoyed it. For a pretty old game this isn't bad game at all.

. A truly incredible game with an immersive, enjoyable story that is easy to get lost in. Gameplay is smooth, combat and stealth both are extremely good all around.

trust me, when you fire this game up, your little \u2665\u2665\u2665\u2665in nuts are gonna start quAkIn buddy. your little N U T S are gonna be QuaKiNg. EAAAAAAAAAAHHHHHHHHH EHAHHHHHHHHH EAHHHHHH YOURE GONNE SHOOT\u2665\u2665\u2665\u2665\u2665 YOURE GONNA SHOOT\u2665\u2665\u2665\u2665\u2665 YOURE GONNA SHOOT H O T C U M, EVERY WHERE and thats a promise. thats a promise folks. youre gonna shoot \u2665\u2665\u2665\u2665in hot \u2665\u2665\u2665\u2665 all over your computer all over your mechanical keyboard and your razor mouse i swear to god that you will bust a nut the first time you play CLAP thats my money back garuntee if you dont bust a nut the first time you play message me. This is one of my favorite games. I love taking shooters stealthily and the Deus Ex series fits just fine. You can hide behind walls, turn invisible, stab people in the back, then drag them out of sight, OR you can jump in front of everyone, say, "WASSUP \u2665\u2665\u2665\u2665\u2665ES" and use the Typhoon (it's basically a 360-degree grenade launcher). The story is nice, too. Get the director's cut!
